

# Wright Brother's Day

Saturday, December 16; 10am-4pm  
Spring Mill State Park; Grissom Memorial

Discover how a plane is able to soar through the air while building your own paper airplanes and testing their design.

Learn how two men from Indiana, working alone with little formal scientific training, became the first to conquer the air on December 17, 1903.

Gaze through a specially-fitted telescope at our closest star to look for sun spots and solar flares

Build your own wooden model of a biplane, similar to the craft that lifted the Wright Brothers into history at Kitty Hawk.

Watch a documentary on the National Air and Space Museum's unique Paul E. Carter Facility, where historic air and space craft are restored and preserved.

Listen as a local pilot and flight historian discusses the stories and events behind our ability to soar through the sky.
